

**In the Specification:**

Please enter the following changes as indicated to the second paragraph of the Summary of the Invention beginning on page 1 at line 9:

In the production of concrete blocks, the green or uncured concrete mix is placed in a mold box upon a pallet. The block and pallet with the concrete mix or material are vibrated to cause compaction of the mix prior to curing. Thereafter, the mold box is separated from the compacted mix upon the pallet and the mix in block form is allowed to cure upon the pallet for eventual removal and use. U.S. patents 3,679,340; 4,036,570; and ~~4,059,925~~ 4,095,925 owned by Besser Company of Alpeana, Michigan, relate to concrete block molding machines and are incorporated herein by reference.
